A PUBLICATION OF THE GOVERNMENT STATISTICAL SERVICE

HMSO: 60p net

Government Statistical Service

A service of statistical information and advice is provided to the Government by specialist staffs employed in the statistics divisions of individual Departments. Statistics are made generally available through their publications and further information and advice on them can be obtained from the Departments concerned.

The source for further information about series published in this volume is shown at the foot of each table. Current telephone numbers of these sources as well as general information about the *Monthly Digest of Statistics* can be obtained from the Central Statistical Office, Great George Street, London SW1P 3AQ. Telephone 01–930 5422 Ext. 602.

Enquiries about orders and subscriptions should be made to the publisher, Her Majesty's Stationery Office, PO Box 569, London SE1 9NH. Telephone 01–928 6977.

MONTHLY DIGEST OF STATISTICS

No. 312

DECEMBER 1971

- I. This Digest has been prepared by the Central Statistical Office in collaboration with the Statistics Divisions of Government Departments.
- 2. The name of the department or organisation providing the statistics is shown under each table. Some of the statistics provided by departments are actually collected by other organisations such as nationalised boards and trade associations. The assistance provided by these organisations, too numerous to mention individually, is gratefully acknowledged.
- 3. The figures in the Digest are mainly totals for calendar months or monthly averages.
- 4. Some of the figures included in this Digest are provisional only and may be revised in later issues.

Definitions

- 5. A Supplement of Definitions and Explanatory Notes, published with the January issue, gives detailed definitions of all the terms and units used in the Digest.
- 6. The following general definitions should be noted in using the Digest:

Area covered. Except where otherwise stated, all statistics relate to the United Kingdom of Great Britain and Northern Ireland.

Units of measurement.

Ton = long ton of 2,240 lb.

Gallon = imperial gallon.

Consumption and stocks. The terms 'consumption', 'disposals' and 'stocks' are normally defined in detail in the Supplement to the Digest.

Figures of consumption and stocks are seasonal and should be used with caution. The stocks figures given may often relate to only part of the total stocks in the country.

External trade. Owing to differences in coverage and timing, figures of imports and exports are not always comparable with those for production, consumption and stocks.

Symbols and conventions used

- 7. Symbols. The following symbols are used throughout:
 - .. not available.
 - nil or less than half the final digit shown.
 - * average (or total) of five weeks.
- 8. Change of basis. A line drawn across a column between two consecutive figures indicates that the figures above and below the line have been compiled on different bases and are not strictly comparable. In each case a footnote explains the difference.
- 9. Rounding of figures. In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

Change in Content

10. Table 102. Manufacturers' sales of domestic pottery. The figures are no longer available in the form previously published and in this revised table Jet and Rockingham are now included with Earthenware instead of Stoneware.

⁽¹⁾ Equals total final expenditure on goods and services at market prices less imports of goods and services less taxes on expenditure plus subsidies. Estimates of the gross domestic product at constant factor cost based on statistics of output are given in Table 3. (2) This represents taxes on expenditure less subsidies valued at constant rates.

Note: From 1969 annual and quarterly estimates include revisions which have not yet been incorporated in Tables 4, 6, 7 and 50.

⁽¹⁾ Between June 1966 and June 1967 the industrial classifications of many establishments in Great Britain were corrected. The estimates for June 1967 take account of these reclassifications and the figures for individual industries are therefore not comparable with those published for previous mid-years. Two sets of estimates are given for June 1966 i.e. (a) excluding the effects of reclassifications (for comparison with earlier estimates) and (b) including the effects of re-

classifications (for comparison with subsequent estimates).

(2) Estimates for June 1969(a) are classified according to the Standard Industrial Classification (1958) and are not fully comparable therefore with the estimates for June 1969(b) which are classified on the basis of the Standard Industrial Classification (1968).

(3) The industries included in the index of production are Orders II-XVIII of the Standard Industrial Classification (1958) and Orders II-XXI of the Standard Industrial Classification (1968).

⁽¹⁾ Figures after June 1970 are provisional being subject to revision after the count of national insurance cards at mid-1971.

Sources: Department of Employment Ministry of Health and Social Services (Northern Ireland)

⁽²⁾ The Order Groups of the Standard Industrial Classification are presented in the format of the Standard Industrial Classification 1968. However, estimates for June 1969 (a) and earlier months are classified according to the Standard Industrial Classification 1958 and are not fully comparable therefore with the estimates for June 1969 (b) and later months which are classified on the basis of the Standard Industrial Classification 1968. The industries included in the Index of Production are Orders II–XVIII of the Standard Industrial Classification 1958 and Orders II–XXII of the Standard Industrial Classification 1968.

⁽³⁾ Returns from employers are used for the compilation of this table. Owing to the interruption of postal services, January figures were calculated from a smaller number of returns than usual and no estimates for February are available.

Employees in employment: Production industries(1)

(1) Established and unestablished staff, excluding employees of the Northern Ireland Government. In arriving at the totals two part-time workers are counted as one whole-time worker.

(2) Casual or seasonal staff recruited for periods normally of less than six months. These are included in the

other columns of the top table but excluded from the Analysis by departments.

(3) Including the Department for National Savings and the Ministry of Posts and Telecommunications from 1 October 1969. (At that date the staff of these departments totalled 15.6 thousands).

(4) Most of the functions of Ministry of Aviation Supply were transferred to the Ministry of Defence in May 1971.

Ministry of Social Security before November 1968.

Ministry of Labour up to May 1968. Department of Employment and Productivity up to 19 October 1970. (*) Ministry of Public Building and Works up to 11 November 1970. From 1 January 1971 includes the staff of Ministries of Public Building and Works, Housing and Local Government and Transport.

(a) Ministry of Technology up to 19 October 1970. In October 1969 the Ministry of Technology acquired the functions of the Ministry of Power and certain functions from the Board of Trade.

(°) Board of Trade up to 19 October 1970. From 1 January 1971 includes staff transferred from the Ministry of

Technology. In October 1969 certain functions were transferred to the Ministry of Technology.

(10) Including the Ministry of Health up to October 1968, the Ministry of Power up to October 1969, and the Ministry of Housing and Local Government and the Ministry of Transport up to 11 November 1970.

⁽¹⁾ Numbers as from June 1970 are not directly comparable with earlier years because in England and Wales:

(3) Including regular part-time workers.

⁽a) they include managerial and clerical workers previously excluded.
(b) 'whole time' has now been specifically defined as 40 hours or more work per week, and (c) junior partners previously returned as regular whole-time male workers are now returned separately as farmers, partners and directors and excluded.

2) Includes family workers but excludes farmers' wives.

Note: Figures after June 1970 are provisional and may be revised after the final figures for the mid-1971 count of national insurance cards become available.

(1) Orders III-XVI of the Standard Industrial Classification 1958 and Orders III-XIX of the Standard Industrial Classification 1968.

(2) Figures relate to establishments with more than 10 employees in all manufacturing industries except shipbuilding and ship repairing. (3) Excluding maintenance staff. (4) From June 1969 it is assumed that operatives stood off by an employer for the whole

week have been on short-time for 40 hours each. (5) See footnote (3) to Table 16.

(6) Included Easter Monday.

⁽¹⁾ Including ex-service men and women and other registered unemployed persons aged 18 years and over not classified to an industry. Registered unemployed school-leavers (i.e. persons under 18 not in full-

time education who have not yet taken up employment) are excluded.

(2) Based on the January to May figures (1958 SIC) and the June to December figures (1968 SIC).

(3) The method of seasonal adjustment has been revised and details of this are given in the April 1970 issue of the Employment and Productivity Gazette.

⁽¹⁾ Stoppages involving fewer than 10 workpeople or lasting less than one day have been omitted except any in which the total number of working days lost exceeded 100. The figures for 1971 are provisional.

provisional.

(2) From January 1970 the analysis by industries is based on the Standard Industrial Classification 1968. Figures prior to that date are based on the Standard Industrial Classification 1958.

(3) Where stoppages extend over more than one month, the workers involved are counted in the month in which they first participated.

Source: Department of Employment

⁽⁴⁾ The figures of working days lost relate to the total working days lost within each of the periods shown as a result of stoppages in progress in that period, whether the stoppages began in that period or earlier.

(1) Figures for individual months are averages of the four or five weeks ending on the last Tuesday of each month. Invalidity benefit was introduced on 23 September 1971.

Source: Department of Health and Social Security

Including prescribed industrial disease.

(3) Yearly figures are averages of twelve monthly figures.
(4) These figures include substantial numbers of persons who have been sick for a long time and who may no longer be in employment.

(5) Yearly figures are averages of quarterly figures. Quarterly figures relate to first Monday in February, May, August and November.

(6) Including a diminishing number of widows with pensions of 30s a week derived from the old Contribution. tory Pensions Acts.

Including the elder or eldest child for whom no allowance is payable. Average of twelve months March 1966 to February 1967.

(9) The estimates shown for January 1970 for administrative reasons have not been based on 'claim papers in action'.
(10) Due to national postal strike estimates shown have been based on trends shown in previous five years.

*Average of five weeks.

Pension age means 65 years for men and 60 years for women.
 Some of the supplementary pensions provide for the requirements of a household with more than one pensioner.
 Includes a small number of persons over pension age.

⁽¹⁾ Excluding agricultural holdings of one acre or less in extent in Great Britain until 1969. With effect from June 1970 the census was extended in Great Britain to cover all holdings with significant output including those on one acre of agricultural land or less, at the same time about 16,000 holdings

Sources: Agricultural Departments

output including those on one acre of agricultural land or less, at the same time about 16,000 holdings in Scotland with negligible output were excluded from the census. In Northern Ireland excluding holdings of less than one acre. (2) Excludes Scotland. (3) Weight in pod. (4) Shelled weight. (5) Excludes rape grown for oilseed in England and Wales. (6) England and Wales only. (7) Production figures relate to hay only. The production of hay in England and Wales is calculated from the area cut for hay and actually harvested and does not include the area mown for silage, drying or seed: the production of hay in Scotland and Northern Ireland is calculated from the area cut for hay only and does not include grass mown for silage or drying. (8) Clover and rotation grasses. (9) Includes lucerne. (10) Includes hay from permanent grass in Scotland. (11) Includes hay from lucerne. (12) Includes the total area of deer forest land in Scotland. (13) The fall of 939,000 acres between 1969 and 1970 is largely accounted for by exclusion from the census of the 16,000 holdings in Scotland referred to in note(1). (14) These items were included on the England and Wales census form for the first time at June 1969 and the figures for that year are understated. It is estimated that the figures include some 53,000 acres in 1969 and 96,000 in 1970 previously returned as crops and grass or rough grazing. previously returned as crops and grass or rough grazing.

⁽¹⁾ Mines operated by the National Coal Board which account for about 99 per cent of the total output. Changes in the basis of the recorded figures have occurred from time to time making comparisons difficult. The figures given in this table have therefore been adjusted where necessary to conform throughout to the current definitions given in the Supplement of Definitions and Explanatory Notes.

* Average of five weeks.

Coke

Great Britain

⁽¹⁾ Including stocks held at iron and steel industry ovens. * Average of five weeks.

Production of gas

(1) Excluding the fuel industries which produced:

 Coal mines (1969/70)
 ...
 ...
 ...
 ...
 575

 Gas works (1969/70)
 ...
 ...
 ...
 ...
 ...
 221

 Mineral oil refining (1969)
 ...
 ...
 ...
 1,746

These industries accounted for an average weekly production of about 49 million kilowatt hours in 1969 as compared with 337 million kilowatt hours produced weekly in 1969 by the industries included in the table.

⁽²⁾ Electricity supplied by United Kingdom Atomic Energy Authority prototype reactors to the public electricity supply system.

^{*} Average of five weeks.

Arrivals of tanker-borne crude petroleum and petroleum products(')

At steel works and steel foundries. (2) At steel works, steel foundries and blast furnaces.
 Stocks at producers' works of ingots, semi-finished and finished steel in terms of ingot equivalent. From March 1970 the figures are revised due to re-measurement.
 From January 1971, figures include stock of semi-finished steel for the manufacture of heavy products previously not reported.
 The figures for 1970 onwards include deliveries of welded tubes over 16 inch outer diameter.

⁽⁵⁾ The figures for 1970 onwards include deliveries of (6) 53 weeks period. (7) Average of fourteen weeks.

* Average of five weeks.

(1) Includes naval vessels registered as merchant ships.
(2) Gross tonnage (100 cubic feet per g.t.) is the total volume of all the enclosed spaces of a vessel.
(3) The total tonnage specified on ordering vessels differs slightly from the total actual measured tonnage on completion.

(6) Modifications and cancellations exceed new orders for the period.

⁽⁴⁾ Vessels are shown for export if they are for other than UK registration.
(5) Modifications include alterations of 500 gross tons or more to the tonnage and the country of registration of vessels already on order.

Merchant shipbuilding('): Vessels of 100 gross tons and over(2)

(1) Spinning, doubling processing, weaving and converting parts of the cotton industry, plus man-made fibre, wool, jute carpets and hosiery industries. (2) These indices have been adjusted to allow for the differences in the lengths of calendar months but not for holidays or for other seasonal variations. (*) The index numbers for individual sectors relate to the total output of manufacturers whose main business is in that sector of the industry and not output of that particular type of garment.

(1) Manufacturers' sales by establishments employing 25 or more persons. (2) Including garments made-up from knitted fabrics of all types by establishments engaged in knitting, except those engaged solely in warp knitting and, from 1966, those engaged mainly in warp knitting. (3) Excluding shirts from first quarter 1971. (4) Excluding infants' gloves, bootees, infantees, etc. until 4th quarter 1970. (5) Included in the preceding columns. (6) Prior to 1968 figures for women's tights and panti-hose were not collected separately.

(1) The figures relate to schemes of 10,000 sq. ft. and over. (2) For all projects (new buildings, extensions to existing premises and buildings converted to industrial use) for which industrial development certificates were issued. (3) These regions take in the places designated as Development areas under the Industrial Development Act, 1966: the aggregate figures for the Development areas are shown separately. (4) For manufacturing industry only (new buildings and extensions to existing premises). The definition of floor area approved was extended in August 1966 and this is increasingly reflected in completion in the following years.

(1) Excluding building which is wholly financed from private sources. (2) From January 1960 for Scotland and Sources: Department of Education from April 1960 for England and Wales the cost of school meals projects has not been separately recorded. The and Science from April 1960 for England and Wales the cost of school meals projects has not been separately recorded. Ine value of such projects, shown separately for the years 1946 to 1959 in previous tables of educational building, has been included as appropriate under the headings 'Primary and secondary' and 'Special schools'. (3) Figures for England and Wales include the value of projects for which specific approval is not required. (4) Totals for England and Wales include the value of certain projects for which no analysis between type of project is available. As from October 1961, the individual value of such projects is less than £2,000. (5) Figures for England and Wales relate to project values and those for Scotland to contract values. Figures for Scotland include the cost of certain minor projects for which specific approval is not required. (6) The Scottish figures of projects approved refer to approval at the sketch plan stage, which might be some six to twelve months before the approved refer to approval at the sketch plan stage, which might be some six to twelve months before the start of construction. (7) The Scottish figures of 'Under construction' and 'Completions' are based on the tender costs. The 'Under construction' and 'Completions' figures exclude the value of approved school projects which in 1969 amounted to £1,246,000 and £406,000 respectively.

⁽¹⁾ The method of calculation of the number of new places provided differs in England and Wales and Scotland. In England and Wales the figures refer to the number of pupils for which new school accommodation is designed. In Scotland the figures refer to the sum of the approved capacities of all the teaching rooms whether classrooms or practical rooms, and will normally exceed the number of pupils for which accommodation is designed.

(2) Including new schools brought into partial use before completion.

Sources: Department of Education and Science Scottish Education Department

⁽²⁾ Including new schools brought into partial use before completion.
(3) Extensions, alterations, remodelling and war damage repairs.

				I		1						

⁽¹⁾ The annual figures for road transport are estimated from periodic sample enquiries and traffic counts data. These have been revised in the light of results from the 1967/8 survey of road goods transport. From 1970 a continuing sample enquiry has allowed quarterly estimates to be made. (2) The quarterly figures relate to 13 week periods and not to three calendar months. (3) Not over 30 cwt. unladen weight. (4) Includes vehicles with drawbar trailers. (5) Provisional.

⁽¹⁾ Passenger journey figures for 1969 and subsequently are no longer strictly comparable with those for previous years, due to the transfer from British Rail to London Transport railways of the Bow to Upminster line on I January 1969 and of the London Paddington to Westbourne Park service on I January 1970. In addition the three stages of the new $10\frac{1}{2}$ mile Victoria Line were opened to traffic by London Transport commencing respectively on 1 September and 1 December 1968 and 7 March (2) The four-weekly averages for each year are computed from calendar year totals.

The four-weekly figures are subject to correction in the following year.
 The four-weekly averages for each year are computed from calendar year totals.
 Freight train traffic only.
 From January 1969, figures do not include freight carried on behalf of National Carriers Ltd.

United Kingdom airlines(1)

⁽¹⁾ Statistics of visible trade on a balance of payments basis are obtained by making certain adjustments in respect of valuation and coverage to the statistics recorded in the Overseas Trade Statistics. These adjustments are summarised in Table 125 below; they are described in detail in United Kingdom Balance of Payments 1971 (the Pink Book). The statistics in Tables 126–141 are on an Overseas Trade Statistics basis.

(2) Export unit value index as a percentage of the import unit value index. (3) Provisional.

(1) In addition to its lending, the National Loans Fund meets the interest and management charges of the National Debt. To the extent that these charges are not matched by interest received on its own lending and by profits of the Issue Department of the Bank of England, the Consolidated Fund meets the difference. The surplus on the Consolidated Fund is paid to the Fund, leaving the difference between that and its net lending as the Fund's financing requirement. (2) Loans under the Ship Credit Scheme and to the Shipbuilding Industry Board and building societies. (3) Loans to Votes for US military aircraft, and Town and Country Planning compensation; and lending to Northern Ireland Exchequer. (4) Calculated on the new basis for purposes of comparison.

(1) This is equal to Exchequer borrowing and special transactions (net) less receipts from extra-Exchequer funds, etc. It is also equal to the amount the central government borrows less any increase (or plus any decrease) in its official reserves.

A negative item represents a surplus, a positive item a deficit.

(3) Including in March of each year transfer of surplus of the death duties surrendered securities account.

(4) The cumulative monthly figures do not agree precisely with the quarterly figures because of adjustments, incorporated in the latter, for accrued interest on National Savings and for issued coin. Monthly figures before April 1971 exclude N. Ireland central government debt.

(*) Excluding borrowing from the National Loans Fund.
(*) Calculated on the new basis for purposes of comparison.
(*) Including surrender of final balance on the local loans fund.

Adjustment for redemption of government guaranteed stock.
Consolidated Fund liability for service of the National Debt: balance carried over until March.

(1) Figures supplied by the Bank of England and rounded to the nearest £5 million.

(2) Total deposits less (i) balances with, and cheques in course of collection on, other banks in the United Kingdom and the Republic of Ireland and (ii) items in transit between offices of the same bank.

(3) Comprising (i) Coin, notes and balances with Bank of England, etc. (excluding special deposits), (ii) Money at call and short notice; (iii) Bills discounted, which include re-financeable export credits.

(4) Excluding items in transit.

Excluding advances to nationalised industries (including, from 28 July 1967, the British Steel Corporation). (6) Some changes have been made in the accounting procedures of the clearing banks. Changes in the treatment of transit items at mid-January 1970 are estimated to have reduced London clearing banks' gross deposits by about £350 million. From January 1970, inner reserves and sundry provisions were transferred from gross deposits: this reduced gross deposits by some £500 million and affects the ratios. From January 1970, the investment figures are affected by the revaluation of investments following full disclosures of profits. This produced an upward revision of some £75 million.

(1) Total deposits less items in transit between offices of the same bank.
(2) Comprising (i) Coin, notes and balances with Bank of England (excluding special deposits); (ii) Balances with other banks etc.; (iii) Money at call and short notice; (iv) Bills discounted.
(3) Liquid assets include, and Advances exclude, re-financeable export credits.
(4) Deposits called under the Special Deposits Scheme and not at the banks' free disposal.
(5) Some changes have been made in the accounting procedures of the Scottish banks. Changes in the treatment of transit items at mid-January 1970 are estimated to have reduced Scottish banks' gross deposits by over £60 million. From January 1970, inner reserves and sundry provisions were transferred from gross deposits: this reduced gross deposits by some £45 million for the Scottish banks and affected the ratios. From January 1970 the investment figures are affected by the revaluation of investments following full disclosure of profits. This produced an upward revision of some £5 million. This produced an upward revision of some £5 million.

(1) Figures are not strictly comparable throughout owing to changes in the composition of the clearings. From 12 January 1968 provincial clearings, with the exception of the afternoon clearing at Liverpool, were abolished and transferred to General clearing. From 1 July 1969

all figures are worked on a 5 day week.

(2) Average of Wednesdays. Includes Bank of England notes held by the Scottish and Northern Ireland Banks as cover for their note issues in excess of the authorised circulation.

(3) Months: average of Saturdays in the consecutive four-week periods as published in The London Gazette or in The Belfast Gazette, with as close a correspondence as possible to the calendar months. Years: average of the thirteen published figures. Excluding coin in the Bank of England, Issue Department.

(5) Total notes and coin outstanding, less notes and coin held by the Bank of England, Banking Department, and by the London clearing banks, Scottish banks and Northern Ireland banks.
(6) The values of Town, General and Credit clearings were reduced as a result of mergers among

the London clearing banks. The changes occurred in December 1969 and January 1970 and to a lesser extent in September 1970; their total effect is estimated to have been: Town clearing -8%, General clearing -10%, Credit clearing -11%

(7) From 20 January until 8 March the figures are affected by a strike of Post Office employees.

(1) Including accrued interest to date.
(2) Contracts in force on 30 November 1971 numbered 281,000 (DNS) and 166,000 (TSB).
(3) National development bonds were replaced by British savings bonds on 1 April 1968.
(4) Nominal value held on behalf of depositors (National and trustee savings banks section).
(5) Including estimated accrued interest.
(6) Includes an adjustment which cannot be allocated to a particular month.
(7) All figures for national savings certificates are provisional.
(8) All figures for premium savings bonds and national savings certificates are provisional.

(9) Provisional.

(1) Derived from yield-maturity curves fitted by computer; an outline of the method used was given in the Bank of England Quarterly Bulletin for March 1967. Taxes are ignored. The yearly figures are averages of endmonth yields. The monthly figures are averages of Wednesdays.

(2) Average of working days, based on the mean of the middle opening and middle closing prices each day, excluding gross accrued interest; tax is ignored.

(3) Averages of daily figures calculated from middle market closing prices.
(4) Gross redemption yields of 15 stocks so combined as to give a yield average for a constant 20-year term.
(5) From January 1966 stocks with coupons below 5 per cent were omitted from the calculations.

(1) The figures represent the average earnings, including bonus, overtime, etc., and before deduction of income Source: Department of tax or insurance contributions, in one week in the months indicated. Administrative and clerical workers and other salaried persons have been excluded. Certain qualifications are given in a full account of the enquiry relating to October 1970, published in the Department of Employment Gazette for February 1971.

relating to October 1970, published in the Department of Employment Gazette for February 1971.

(2) From and including October 1967 includes (a) dock workers previously on daily or half-daily engagements and (b) postmen.

(3) This index relates only to the industries covered by the earnings enquiry. It should not be confused with the figures in Table 166 which cover all industries.

Average weekly hours worked(')

⁽¹⁾ The figures are based upon changes in basic rates of wages or minimum entitlements and reductions in normal weekly hours, which are normally determined by national collective agreements or statutory wages regulation orders. The information relates to the end of the month and, where necessary, the figures may be revised to take account of any changes having retrospective effect or reported belatedly. A brief note on the method of compilation of the figures is given in the current issue of the Department of Employment Gazette.

(2) In general, males under 21 and females under 18 years of age.

(3) The term 'Manufacturing industries' covers all industries included in Orders III-XIX of the Standard Industrial Classification, 1968.

(1) The figures relate to changes in basic full-time weekly rates of wages or minimum entitlements and do not reflect reductions in normal weekly hours without loss of pay or variations in actual earnings arising from such factors as overtime or lost time. The changes included are those determined by national collective agreements or by statutory wages councils or boards.

or by statutory wages councils or boards.

(2) The monthly totals in the columns headed 'Increase' and 'Decrease' relate to the number of workpeople affected by changes and the corresponding gross amounts. Workpeople affected by two or more changes are counted only once in the annual totals which relate to the number having increases only or for whom increases exceeded decreases, the number having decreases only or for whom decreases exceeded increases, and the corresponding net amounts; the column headed 'Net increase,' is therefore the overall net increase for the year.

(3) The annual totals of net increases in basic weekly rates of wages mean that the total wage bill of the country, in the industries and for the weaklesses of exceeding the product of the country, in the industries and for the weaklesses of exceeding the column to the country of the country, in the industries and for the weaklesses of exceeding the column to the country of the count

(3) The annual totals of net increases in basic weekly rates of wages mean that the total wage bill of the country, in the industries and for the workpeople covered by the statistics, for a full ordinary week's work at basic rates of wages at the end of any one year exceeds that for the corresponding week of the preceding year by the amount stated. The average weekly wages paid during any one year will not, however, exceed those paid during the preceding year by this sum, as the actual changes will have taken place at various dates during the year.

⁽¹⁾ The Cost of Living Advisory Committee recommended in 1962 that until a satisfactory index series based on actual prices became available half the expenditure on meals out should continue to be allocated to the food group and the other half spread proportionately over all groups, including the food group. The index for meals out for 16 January 1968 implicit in this recommendation was 121-4. Since January 1968 an index series based on actual prices has been available and indices in this series nave been linked with the implicit index for meals out for 16 January 1968, to obtain indices for meals out with 16 January 1962 taken as 100.

(2) These are the weights which would have been used in 1968 if expenditure on meals out had been treated as in previous years (see footnote (1)). The weights actually used are given in the following line.

(1) Based on manufacturers' list prices.
(2) The market-price series are based on prices before the addition of subsidies paid to producers under

(*) The market-price series are based on prices before the addition of subsidies paid to producers under the Cereals Deficiency Payments Scheme and Fatstock Guarantee Scheme.

(*) The gross-price series for wheat, cattle and pigs are based on prices after the addition of subsidies paid to producers; those for milk and eggs on prices paid to producers by the marketing boards for these commodities; and that for potatoes on producer prices, sometimes 'supported' by the Potato Marketing Board. (*) Figures to June 1969 have been adjusted to final deficiency payments.

(7) Based on net prices to farmers after deduction of subsidy. (8) Provisional.

Source: Ministry of Agriculture, Fisheries and Food

 ⁽⁵⁾ Maincrop potatoes only.
 (6) Based on guaranteed minimum prices to producers at packing station until March 1966, then to March 1970 on BEMB prices to producers under the Egg Contract Schemes. From April 1970 until March 1971 minimum producers prices as in years prior to March 1966. Thereafter based on average price paid to producers at packing stations.

SOCIAL TRENDS No. 2 1971

The second edition of the highly successful new annual from the Central Statistical Office brings together key statistics relating to all areas of social policy and conditions and highlighting, with coloured charts and diagrams, the broad trends and patterns in our society.

This edition builds on the first with many detailed additions and innovations. There are, for example, new sections on social services manpower and the environment. The housing section has been substantially revised and much new material added to the social security, education and justice and law sections.

Throughout all of the sections there is included more regional material and more statistics are presented on a United Kingdom rather than England and Wales basis.

Complementing the new section on social services manpower is a major article which evaluates the trends and discusses some of the problems in this area. A second article deals with trends in certificated sickness absence. The other two articles in this issue are methodological—one on the use of models in projecting trends in the social and environmental fields and one by members of York University, on the development of 'state of health' indicators.

Also new in this edition is a set of tables giving international comparisons for many specific aspects of social conditions.

Social Trends No. 1 was highly commended by the Library Association as an outstanding new reference work. There are half as many more tables again in the second issue.

Social Trends No. 2 is published by HMSO, price £2.90 (postage extra), and can be obtained at any of the addresses on cover page iv or through booksellers.
